I. RESTRICTION

1. Restriction to one of the following inventions is required under 35 U.S.C. § 121:

I. Claims 1-6, drawn to a mounting bracket classified in Class 248, subclass

unknown.

II. Claims 7-20, drawn to a bracket for a ignition coil assembly, classified in Class

123, subclass 634.

Inventions of the mounting bracket and bracket for a ignition coil assembly are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations. (M.P.E.P. § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because it may support any device. The subcombination has separate utility such as a device to hold an ignition coil.

2. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.
